Introduction

This is a report of State activity in the Food Stamp Program. The data contained herein is State reported data or data calculated from State reported data.

The tables are based on data for all of Fiscal Year 2001. March 2002 was set as the cutoff date for receipt of data for the States through the established reporting channels. It should be noted that the FNS-366B data is by State fiscal year, which varies among the States. In a few instances, the data is still being collected or refined.

As may be expected in a report of this size and taken from multiple data sources, there are some apparent discrepancies in reported data. Most discrepancies are due to compiling the data at different times and from different data sources within the State. The notation on each table identifying the data source is provided to assist the reader. The data was compiled from the National Data Bank, the official repository of Food Stamp Program data. This data was prepared by the State Administration Branch of the Program Accountability Division.

We have again included a recipient claims table which reports on the methods used by State agencies to collect claims against recipient households. Some of the data included in the recipient claims table is derived from tax offset weekly statistical reports prepared by the U. S. Department of the Treasury. We have also included data on disqualified recipients from our Disqualified Recipient Subsystem, a Federal database which provides information on disqualified recipients to State agencies. In addition, a "Rankings" section again has been included in the report. That section contains tables which rank participation and issuance data, from high to low, for each State for FY 2001.

We also wish to point out that selected program statistical data and updates on electronic benefit transfer State status are available on the Food Stamp Program web page at www.fns.usda.gov/fsp.

If there are any questions concerning the data in this publication, contact:

Notable Trends

Participation and Issuance

In fiscal year (FY) 2001, State agencies issued approximately \$15.5 billion in food stamp benefits to a monthly average 7.4 million households or 17.3 million people participating in the Food Stamp Program (FSP). The average monthly benefit was \$74.83 per person or \$173.98 per household. The Federal Government pays 100 percent of the benefits. In FY 2001, participation increased 0.6 percent from 17.2 million people the previous year, and issuance increased 4 percent from \$15.0 billion in FY 2000 to \$15.5 billion in FY 2001. Thirty-three State agencies had an increase in participation in FY 2001.

Electronic Benefit Systems

The Personal Responsibility and Work Opportunity Act of 1996 mandates that all States must convert from paper coupon systems to an electronic benefit transfer (EBT) system before October 1, 2002. EBT systems issue and redeem benefits through the use of cards, electronic funds transfer networks, and point-of-sale technology in authorized retail food stores. In FY 2001, the movement to EBT continued to make monumental strides with \$12.3 billion issued in electronic benefits to a monthly average 5.9 million households. EBT is the primary issuance system and benefit type for the FSP, accounting for 79 percent of all issuance. In September 2001, 43 States (including the District of Columbia) were operating an EBT system, with 40 States issuing electronic benefits essentially statewide in place of coupons. At the end of the fiscal year, 83 percent of households were on EBT.

Direct Access

In FY 2001, State agencies issued \$1.7 billion in food stamp benefits via direct access, the second most prevalent form of issuance. In a direct access system, the issuance agent accesses the file to issue food coupon benefits to the household.

Mail Issuance

In FY 2001, State agencies issued \$1.0 billion in food stamp benefits by mail. Mail issuance is the third most prevalent form of issuance in FY 2001, accounting for 6 percent of all issuance. Under mail issuance, coupons are mailed to the eligible household.

In FY 2000, 28 State agencies issued coupons through the mail. The dollar loss from mail issuance systems remained at \$4.7 million in FY 2001.

The mail issuance loss tolerance level is .5 percent at the county level, .35 percent at the administrative district, or .3 percent Statewide. Under the .5 percent tolerance level, the Federal Government would absorb a maximum loss of 50 cents per \$100 issued. On a

Statewide basis, 8 States had a loss rate less than .3 percent and 15 States were under the .5 percent county standard. Using the .3 percent Statewide rate, the States' collective share of the loss would have been \$1.8 million. The change to EBT and the decline in participation have resulted in lower mail issuance and thus lower dollar losses of mailed coupons in the past few years, resulting in savings for both the Federal and State Governments. As more States switch to or expand EBT, mail issuance volume and losses are expected to continue to decrease.

Cash-out

Cash-out projects are limited to certain pilot projects authorized in the Food Stamp Act that either have continued to operate since 1981 or that were approved prior to August 1996. While technically not considered part of the EBT system for issuance, redemption, and reporting purposes, States with FNS-approved cash-out issuance systems (for wage supplementation, welfare reform, or other approved demonstration projects) may issue cash-out benefits electronically, in place of paper checks. Cash-out benefits may be issued electronically via either direct deposit or debit cards which can be used at automatic teller machines to draw the funds. In FY 2001, \$99 million in cash-out benefits were issued to 94,000 households in 11 States. Cash-out represented 0.6 percent of issuance.

Administrative Costs

State agency administrative costs are affected by a number of factors including participation levels, the number and salary level of State staff, inflation, the location of State agency offices, type of issuance system, worker training costs, degree of automation, level of fraud control activity, etc. The Food and Nutrition Service (FNS) pays 50 percent of State agency administrative costs to operate the program. Total State agency administrative costs prior to Federal cost sharing were \$4.6 billion, up 6 percent from \$4.4 billion the previous year. In FY 2001, the Federal share of administrative costs increased 7 percent from \$2.0 billion the previous year to \$2.2 billion.

The Federal share of certification costs increased 5 percent in FY 2001 from \$1.086 billion in FY 2000 to \$1.141 billion. The Federal share of the certification cost per case (i.e., per household) per month increased from \$12.34 per case month to \$12.76 per case month.

Fraud Control

In FY 2001, State fraud investigations increased to 864,282, compared to 855,535 in FY 2000, a 1 percent increase. The number of fraud hearings, prosecutions, and recipient disqualifications declined from the previous year. In FY 2001, the number of recipients disqualified from the Food Stamp Program for an intentional program violation declined to 68,728, a 16 percent decline from the previous year. About 66 percent of the

disqualifications came out of the administrative fraud hearing process.

On the Federal level, FNS operates the Disqualified Recipient Subsystem (DRS). DRS is a centralized national database, utilizing data submitted each month by all 50 States, the District of Columbia, Guam, and the Virgin Islands, that tracks individuals disqualified from participation in the FSP for intentional program violations. DRS assists States in assigning the correct penalty, which varies by the type and number of the offense, to individuals being disqualified. It also assists States in preventing these individuals from crossing State lines and participating in another State during the period of their disqualification. Because an individual may be permanently disqualified, these records are held indefinitely. As of September 2001, this Federal database had records on over 822,000 recipients and over 883,000 disqualifications.

Recipient Claim Collections

Recipient claims are established against any household that has received more food stamp benefits than it is entitled to receive. Claims fall in three categories: intentional program violation (fraud claims), inadvertent household error, or agency error. State agencies are entitled to 35 percent of fraud claims and certain inadvertent household error claims collected and 20 percent of the remaining inadvertent household error claims collected.

In FY 2001, State agencies established \$253 million in new claims against households for overissuances and collected over \$207 million. The average new claim established was for \$393. Collections declined 5 percent in FY 2001. Collections via recoupment, in which the State agency uses a part of the benefit otherwise payable to the household to pay an outstanding claim, increased in FY 2001 due to the increase in participation.

During the fiscal year over \$79 million out of the total State agency collections reported above was collected by the Federal Government through the Treasury Offset Program (TOP). As a participating partner in this program, State agencies notify the household and then send the delinquent claims through FNS to Treasury for possible collection under this program. This Federal program offsets amounts from any eligible Federal payment otherwise due a household and uses those funds to pay the outstanding claim. The collections are made by Treasury on behalf of the FSP. The Federal collections make up 38 percent of total State agency collections for FY 2001. In FY 2001, 50 State agencies participated in the Federal debt collection program. Since its inception in FY 1992, the Federal debt collection program has collected \$471 million in food stamp recipient claims.

FOOD STAMP PROGRAM ACTIVITY - FY 2000-2001

ACTIVITY	FY 2000	FY 2001	PERCENT CHANGE

Note: State agencies are liable for mail issuance losses in excess of .5% of value issued at the project level, .35% at the administrative level, or .3% at the State level, depending on reporting and liability level selected by the State agency. A negative loss occurs when mail returns for which replacements were previously issued in a prior period exceed replacements during the current period.

The Disqualified Recipient Subsystem is a Federal system of records that is used to identify individuals with a prior disqualification record for penalty determination purposes and individuals who are currently serving a disqualification period from another State. Above data includes both current year and historical disqualifications.

Washington	\$81,980	\$2,637,221	\$533,196	\$3,252,397
US	\$23,607,826	\$172,722,470	\$57,115,948	\$253,446,244

Note: Some States show no or low fraud claims newly established because they establish such claims as household error and subsequently transfer the claim to fraud after the court or hearing officer's determination. See pages 25 and 27 for amount of determined fraud from prosecutions and administrative disqualification hearings which combined are a better measure of the amount of fraud claims ultimately established.

Totals may not add due to rounding. * Calculation includes all State methods except for recoupment and Federal collections from Treasury Offset Program minus all refunds and negative adjustments.

** Includes Treasury Offset Program collections but not voluntary payments and offset fees paid by client. Total is for calendar year 2001. However, 96% of Federal collections occurred during FY 2001. Some offsets subject to refunds.

TOTALS MAY NOT ADD DUE TO ROUNDING.

1/ SOME STATES ESTABLISH POTENTIAL FRAUD CLAIMS AS HOUSEHOLD ERROR CLAIMS INITIALLY AND THEN TRANSFER THE CLAIM FROM INADVERTENT HOUSEHOLD ERROR TO FRAUD CLAIM AFTER THE PROSECUTION OR FRAUD HEARING. THUS, THE SUM OF THE FRAUD INVOLVED FROM PROSECUTION AND FRAUD HEARINGS IS A BETTER MEASURE OF THE AMOUNT OF FRAUD CLAIMS ULTIMATELY ESTABLISHED.
